General management training and functional training through a mix of “hands-on” and “class room” approaches for those operational positions highly impacted by the implementation of FMS is a necessity. Heads of department and operational staff in units concerning information and communication technology, supply chain management, and finance and administration will all require functional training in areas of asset inventories and valuation as well as utilization of software and hardware solutions. Topics should address the use of the new hardware and software introduced for barcode, scanning device hardware and software, and a simple graphic overview of the ways in which the new software application integrates with an FMS application. On-site training is envisaged and it is expected the contractor will perform initial data collection on-site with KSG staff and testing of the compatibility of the systems.
